

All pixels

Pixels assigned to an environmental group but no unit. Most barely intersect with ice-free areas.

Pixels assigned to an environmental group and a unit based on complete data environmental and functional group suitability data.

Pixels not assigned to an environmental group because of lack of data, but occurring on islands, peninsulas, and land outcroppings mostly surrounded by water were placed in their own environmental group and classified into units based on suitability data.

Pixels in group 6 that did not match coastal description were discarded.
